

TETON
SERIES

The logo features a stylized mountain range composed of several overlapping triangles in shades of brown and tan. Below the mountains, the word "TETON" is written in a large, bold, serif font. Underneath "TETON", the word "SERIES" is written in a smaller, all-caps, sans-serif font, flanked by two horizontal lines.

The Teton Series is a beautiful collection of 1 $\frac{3}{8}$ " thick Knotty Alder interior doors, a choice that will add character and warmth to your home. Manufactured in the U.S.A. at our state-of-the-art factory in northern Colorado, Teton Series doors are the absolute highest quality, priced at the best value. We sell direct to the trade or homeowner, offer pre-hung and factory pre-finished options, and ship directly to your home or construction site.

Craftsmanship

Our stiles and rails are engineered to resist bowing and warping. We use industry-leading $\frac{1}{8}$ " thick veneers, with superior quality TimberStrand® Laminated Strand Lumber (LSL) core material.

Our panels are solid wood—much higher quality than pressboard panels with thin veneers, or hollow core panels found on lower quality imports. Panels are manufactured with small width boards, edge glued to create the larger width panel. Individual boards are random widths, glued in alternating grain patterns to balance the panel and reduce the natural tendency of the wood to warp.

Our doors are assembled with bore and dowel construction, using $\frac{1}{2}$ " diameter dowels. Panels fit into grooves in the stile and rail components, and “float” on rubber spacers to allow for minor expansion and shrinking of the wood with the natural moisture and environmental changes of the home.

We also offer optional pre-hanging of the doors, with solid Knotty Alder flat jambs, and square-corner hinges in a selection of color choices. Boring and strike/latch mortising for hardware are provided at no additional cost.

Standard Sizes

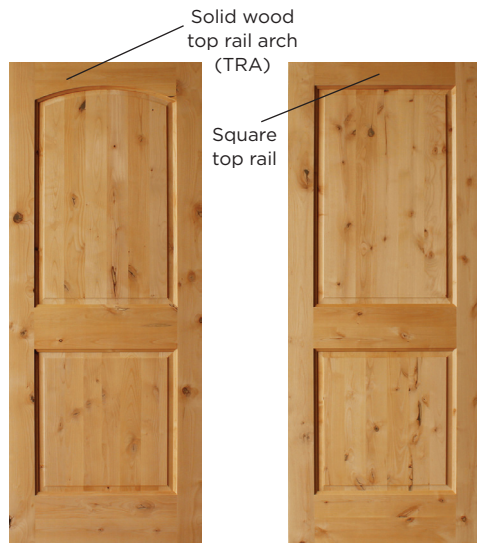

See size restrictions on 3-11 and Glass door designs.

Heights	6'8"	Widths	
	8'0"	1'6"	2'6"
		2'0"	2'8"
		2'4"	3'0"

Designs

RAISED PANEL

2-PANEL TRA
TF-0200-D008-T

2-PANEL SQUARE
SQ-0200-D008-T

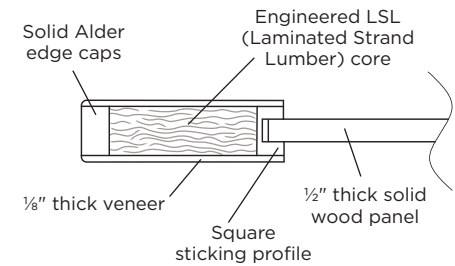

- Two solid wood raised panels with beveled sticking
- Bore and dowel construction
- Engineered LSL core stiles and rails with 1/8" thick veneer

CRAFTSMAN

3-PANEL HORIZONTAL
SQ-0300-D045-T

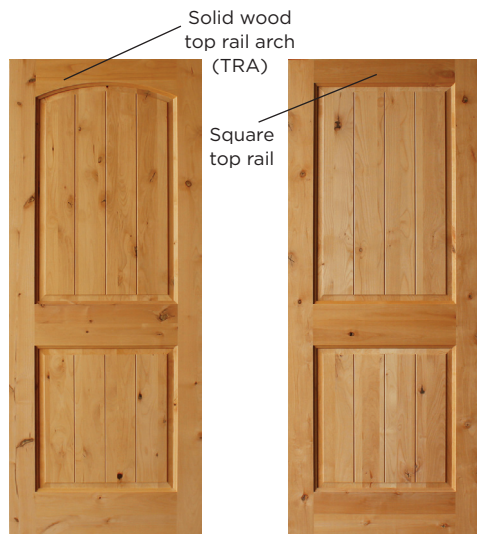

3-PANEL 3-11*
SQ-0300-D017-T

- Three flat solid wood panels with square sticking
- Bore and dowel construction
- Engineered LSL core stiles and rails with 1/8" thick veneer

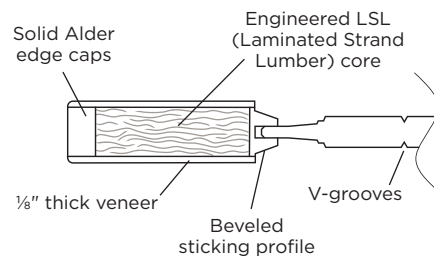

* 3-Panel 3-11 available in 6'8" height only.
3-Panel 3-11 in 1'6" width has only two panels—
one panel on top and one vertical panel.

PLANK

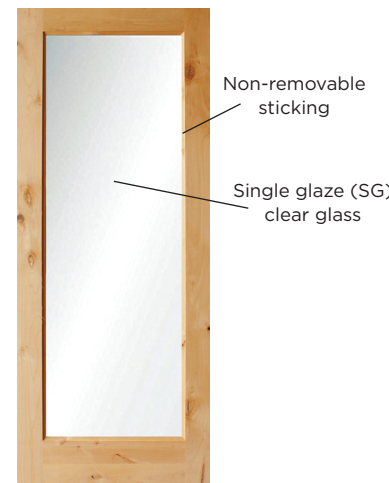

2-PANEL PLANK TRA
TF-0200-D008-TV

2-PANEL PLANK SQUARE
SQ-0200-D008-TV

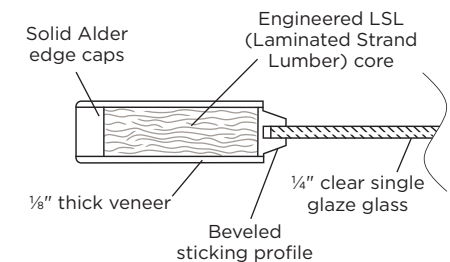

- Two solid wood raised panels with V-grooves and beveled sticking
- Bore and dowel construction
- Engineered LSL core stiles and rails with 1/8" thick veneer

GLASS

GLASS 1-LITE**
SQ-0001-D002-T

- 1/4" clear single glaze (SG) glass with beveled sticking
- Bore and dowel construction
- Engineered LSL core stiles and rails with 1/8" thick veneer

**Glass 1-Lite available in 2'6" and 3'0" widths only.

Pre-finishing

Factory pre-finishing is a hallmark of Sun Mountain. We offer the highest quality factory-applied stains and glazes. Our pre-finished products are ready to install, reducing time and scheduling during construction.

Our pre-finish process includes:

- A minimum of 30 minutes per door hand-sanding
- A “clean room,” dust-free environment not achievable on the jobsite—preventing small dust and dirt particles from settling on the product before drying
- Six-sided coating on doors, providing moisture seal on all sides, preventing warping, and increasing our door warranty from one year to five years
