MADE IN THE
USA

GLACIER
SERIES

Our Medium Density Fiberboard (MDF) doors are “made by hands” in the U.S.A. at Sun Mountain’s state-of-the-art factory in northern Colorado. Sun Mountain’s doors are true stile and rail construction (not routed or moulded), with engineered components to resist warp. Choose from five contemporary designs, pre-primed in the factory, with optional solid Poplar or finger-joint Pine jambs. Our MDF doors are covered by an industry-leading warranty.

Sun Mountain sells direct to the trade or homeowner and ships nationwide to your home or construction site.

High-quality Construction

- True stile and rail construction
- 1¾" thick
- Engineered components with ⅛" thick High Density Fiberboard (HDF) veneers
- Square sticking profile with ¾" thick flat MDF panel
- Factory primed (white)
- Optional pre-hanging available with solid Poplar or finger-joint Pine primed jambs

We also offer optional pre-hanging of the doors, with solid Poplar or finger-joint Pine jambs, and square-corner hinges in a selection of color choices. Boring and strike/latch mortising for hardware are provided at no additional cost.
